West Kirkland Mining Inc. Notes to the condensed consolidated interim financial statements

March 31, 2015

(Expressed in Canadian dollars) (Unaudited)

1. Nature of Operations and Continuance of Operations

West Kirkland Mining Inc. ("West Kirkland" or the "Company") was incorporated on April 3, 2007, under the Company Act of the Province of British Columbia, Canada. The Company was a capital pool corporation, and on May 28, 2010, completed its Qualifying Transaction as that term is defined in TSX Venture Exchange Policy 2.4. The Company acquired all of the issued and outstanding shares of WK Mining Corp. ("WK Mining") which has been accounted for as a reverse takeover that does not constitute a business combination. As a result, these consolidated financial statements reflect the financial position, financial performance and cash flows of the Company's legal subsidiaries, WK Mining and WK Mining (USA) Ltd. The address of the Company's head office is Suite 788 – 550 Burrard Street, Vancouver, BC, V6C 2B5.

The Company is an exploration company working on mineral properties it has staked or acquired, in Nevada and Utah. The Company has not yet determined whether these mineral properties contain any economically recoverable ore reserves. The Company defers all acquisition, exploration and development costs related to the properties on which it is conducting exploration. The recoverability of these amounts is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary permitting and financing to complete the development of the interests, and future profitable production, or alternatively, upon the Company's ability to dispose of its interests on a profitable basis.

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to a going concern, which assume that the Company will realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. Since inception to March 31, 2015 the Company has incurred cumulative losses of \$22.5 million, which may cast significant doubt regarding the Company's ability to continue as a going concern. Should the Company be unable to realize its assets and discharge its liabilities in the normal course of business, the net realizable value of its assets may be materially less than the amounts on the statements of financial position. External financing, predominantly by the issuance of equity to the public, will be sought to finance the operations of the Company; however, there is no certainty that such funds will be available at terms acceptable to the Company. These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern.

2. Basis of Presentation

(a) Statement of Compliance

These unaudited condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting ("IAS 34") using accounting policies consistent with IFRS. These condensed consolidated interim financial statements follow the same accounting policies and methods of application as our most recent annual financial statements. Accordingly, certain disclosures included in annual financial statements prepared in accordance with IFRS have been condensed or omitted and these unaudited condensed consolidated interim financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2014.

(b) Principles of Consolidation

These condensed consolidated interim financial statements include the accounts of the Company and its wholly-owned legal subsidiary, WK Mining Corp. and its wholly-owned legal subsidiary WK Mining (USA) Ltd, both of which are controlled by the Company. Control is achieved when the Company has power over the investee; is exposed, or has rights, to variable returns from its involvement with the investee; and has the ability to use its power to affect its returns. All material intercompany transactions, balances, revenues and expenses are eliminated on consolidation.

(c) Recent Accounting Pronouncements

West Kirkland Mining Inc. Notes to the condensed consolidated interim financial statements March 31, 2015

(Expressed in Canadian dollars) (Unaudited)

These interim financial statements follow the same significant accounting principles as those outlined in the notes to the annual financial statements for the year ended December 31, 2014 with the following standard adopted in the current fiscal period:

IFRS 8, Operating Segments, require an entity to disclose the judgements made by management in applying aggregation criteria to operating segments and to provide clarity that a reconciliation of a reportable segments' total assets and the entity's assets should only be provided if the segment asset details are regularly provided to the chief operating decision maker.

This new standard has not resulted in any material change to the results and financial position of the Company.

A number of new standards, amendments to standards and interpretations applicable to the Company are not yet effective for the current accounting period and have not been applied in preparing these consolidated financial statements. These include:

IFRS 9 Financial Instruments, which replaces the current standard, IAS 39 *Financial Instruments*: *Recognition and Measurement*. The new standard replaces the current classification and measurement criteria for financial assets and liabilities with only two classification categories: amortized cost and fair value. In February 2014, the IASB tentatively determined that the revised effective date for IFRS 9 would be January 1, 2018. The Company has not early adopted this standard and is currently evaluating the impact this standard may have on its consolidated financial statements.

IFRS 15 Revenue from Contracts with Customers. The final standard on revenue from contracts with customers was issued on May 8, 2014 and is effective for annual reporting periods beginning after January 1, 2017 for public entities with early application permitted. Entities have the option of using either a full retrospective or a modified retrospective approach to adopt the guidance. The Company is currently evaluating the impact this standard may have on its consolidated financial statements.

3. Reclamation Bond

The Company's US subsidiary, WK Mining (USA) Ltd. ("WK Mining (USA)"), has posted a total statewide bond of \$196,323 (US\$155,000) to the Bureau of Land Management (the "BLM") in the state of Nevada for disturbance of ground required to complete exploration work on projects in Nevada under the jurisdiction of the BLM. US\$61,400 was included in the purchase of Hasbrouck and Three Hills and the Company increased the bond by a further US\$38,600 bringing the Company's total BLM bond increase in the year to US\$100,000. This bond is applicable to work done on any property in Nevada and the funds are held in the State of Nevada's reclamation performance bond pool. The Company transferred permits associated with the Hasbrouck and Three Hills project into the Company's name.

WK Mining (USA) has also posted a statewide bond of \$63,330 (US\$50,000) to the Division of Oil, Gas and Mining of Utah ("DOGM") for disturbance of ground required to complete exploration work on the TUG Project. This is applicable to work done on any property in Utah under the jurisdiction of the BLM or DOGM. The funds are held in the State of Utah's reclamation performance bond pool. They are held in an interest bearing account and will be returned with interest when the projects are successfully reclaimed. Total interest of \$208 (US\$164) has been earned on this bond.

(a) Hasbrouck and Three Hills

On January 24, 2014, the Company signed a binding letter agreement with Allied Nevada Gold Corp. ("ANV") to acquire ANV's Hasbrouck and Three Hills properties for consideration of up to US\$30 million. The Company was required to pay an aggregate of US\$20 million to acquire a 75% interest in the properties with a US\$500,000 non-refundable cash deposit made upon execution of the letter agreement. The additional US\$19.5 million was paid April 23, 2014 at which time the Company purchased a 75% interest in the properties. The Company has the option to pay an additional US\$10 million to ANV within 30 months of April 23, 2014 in accordance with the terms and conditions of the letter agreement, where it will acquire the remaining 25% interest in the properties. If the Company does not make the additional payment to ANV, or if the Company offers the payment and ANV chooses to decline the payment, the properties shall be transferred into a joint venture with the Company retaining a 75% interest in the joint venture and ANV retaining a 25% interest.

On March 10, 2015, ANV announced that it had filed for Chapter 11 bankruptcy protection in the U.S. and was implementing a financial restructuring of its debt. The bankruptcy of ANV does not alter the Company's legal rights or interests in the Hasbrouck Project and the Company continues to hold title to the properties. The Company's U.S. legal counsel has taken appropriate steps to monitor the process to ensure that the Company is in position to take appropriate action to protect its rights and interests if needed.

(b) Fronteer / TUG

On December 14, 2010, the Company entered into an agreement with Fronteer Gold Inc. ("Fronteer") to option 11 properties which total approximately 234 km² in north eastern Nevada and Utah. On February 3, 2011 Fronteer was acquired by Newmont Mining Corporation ("Newmont"). The acquisition of Fronteer had no effect on the agreement with the Company. In the agreement, the Company had the option of earning in on a number of designated properties and earned a 60% interest on the TUG property in 2013. The Company has no further earn-in requirements on the TUG property and will hold a 60% interest indefinitely. All other properties were written off and earn-in rights relinquished. At December 31, 2014, the Company wrote down the capitalized mineral property costs related to TUG of \$1.7 million to a carrying value of \$3.7 million due to continued depressed commodity prices.

(c) Rubicon

On June 23, 2011, the Company entered into an agreement with Rubicon Minerals Corporation ("Rubicon") to option 909 km² in northeastern Nevada by spending US\$15 million over four years. During 2014 the Company chose to focus on other properties and all deferred acquisition and exploration costs were written off. As the minimum yearly spend requirements were not fulfilled the agreement has now officially lapsed and the Company retains no interest in these properties.

6. Share Capital

The authorized share capital consists of an unlimited number of common shares without par value.

At March 31, 2015 the Company had 294,134,169 shares outstanding.

In April and May 2014 the Company closed a fully marketed prospectus offering of units of the Company, including the exercise of an overallotment option, and a concurrent non-brokered private placement, for a total of 220,940,833 units at a price of \$0.15 each for aggregate gross proceeds of \$33.1 million. Each unit in the offerings consisted of one common share of the Company and one common share purchase warrant exercisable for one common share at a price of \$0.30 at any time prior to April 17, 2019. Including legal fees and a cash commission paid to brokers representing 6% of the gross proceeds raised, the cost of the offerings to the Company was approximately \$2.9 million.

Notes to the condensed consolidated interim financial statements March 31, 2015

(Expressed in Canadian dollars) (Unaudited)

On January 29 and 31, 2014, the Company closed the first and second tranche of a non-brokered private placement of 11,900,000 common shares of the Company at a price of \$0.10 per share for gross proceeds of \$1,190,000. The brokers received a cash commission of \$43,500.

Warrant Reserve

Balance March 31, 2015	220,940,833	\$ 4,418,817	\$ 0.30

During the year ended December 31, 2014 a total of 24,814,301 share purchase warrants expired at a fair value amount of \$1,450,827. The fair value of these options was transferred from warrant reserve to deficit.

During the year ended December 31, 2014 the Company issued 220,940,833 warrants. These warrants were issued pursuant to the fully marketed prospectus offering and non-brokered private placement that both closed in April and May of 2014. Each warrant is exercisable for one common share at a price of \$0.30 at any time prior to April 17, 2019. The \$4,418,817 fair value of these warrants was estimated using the relative fair value method using the share price on the date of issue of the shares and the warrant price from the first day of public trading.

Share based payment reserve

The Company established a stock option plan (the "Plan") on May 1, 2007, whereby options can be granted to directors, officers, employees and consultants at the discretion of the Board of Directors. The number of options that can be granted is limited to 10% of the total shares issued and outstanding.

The following table summarizes the Company's outstanding share options:

Exercise Price	Number Outstanding at March 31, 2015	Weighted Average Remaining Contractual Life (Years)	Number Exercisable at March 31, 2015

Balance March 31, 2015	\$ 1,152,956

During the period ended March 31, 2015, 100,000 share options were granted to an employee of the Company. Each share option is exercisable at a price of \$0.10 for a period of five years and vests immediately. At the grant date the Black Scholes model was used to value these options using the following assumptions:

Expected life	5 years
Risk-free interest rate	0.60%
Expected volatility ¹	80%
Expected dividends	-

¹Expected volatility is based on the trading history of the Company. Given the limited trading history for the Company, this volatility was then compared to the historical volatility of a peer group of companies with a similar corporate structure and operating in similar regions as the Company. The Company's expected volatility is similar to a comparable peer group.

For the year ended December 31, 2014, 7,500,000 share options were granted to various employees, consultants and directors associated with the Company. Each share option is exercisable at a price of \$0.15 for a period of five years and vests immediately. The Company expensed \$560,420 and capitalized \$97,348 to the Hasbrouck/Three Hills property related to these options. At the grant dates the Black Scholes model was used to value these options using the following weighted average assumptions:

Expected life	5 years
Risk-free interest rate	1.47%
Expected volatility ¹	90%
Expected dividends	-

¹Expected volatility is based on the trading history of the Company. Given the limited trading history for the Company, this volatility was then compared to the historical volatility of a peer group of companies with a similar corporate structure and operating in similar regions as the Company. The Company's expected volatility is similar to a comparable peer group.

As at March 31, 2015, the weighted average fair value per option outstanding was \$0.12

7. Capital Risk Management

The Company's objectives in managing its liquidity and capital are to safeguard the Company's ability to continue as a going concern and to provide financial capacity to meet its strategic objectives. The capital structure of the Company consists of equity attributable to common shareholders, comprising of issued share capital, reserves and accumulated deficit.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue new debt and acquire or dispose of mineral rights.

As at March 31, 2015 the Company does not have any long-term debt and is not subject to any externally imposed capital requirements.

8. Financial Risk Management

The Company examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of those risks.

(a) Fair Value

As at March 31, 2015, the Company's financial instruments consist of cash, accounts receivable, reclamation bonds, accounts payable and accrued liabilities. The fair values of accounts receivable and accounts payable approximate their carrying values due to the short-term nature of these instruments and the fair value of the reclamation bonds approximates their fair value due to the fact they earn interest at rates approximating market rates.

(b) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to the short-term interest rates through the interest earned on cash balances; however, management does not believe this exposure is significant.

(c) Credit Risk

Credit risk is the risk of financial loss to the Company if a customer fails to meet its contractual obligations. The Company is exposed to credit risk through its cash which is held in large Canadian financial institutions and accounts receivable. The Company believes this credit risk is insignificant.

(d) Foreign Currency Risk

Foreign currency risk is the risk that the fair value of financial instruments or future cash flows will fluctuate as a result of changes in foreign exchange rates. The Company operates in Canada and the United States and is therefore exposed to foreign currency risk arising from transactions denominated in U.S. dollars. Certain amounts of the Company's accounts payable and accrued liabilities are denominated in U.S. dollars. A 10% change in the exchange rate between the Canadian and United States dollar would have an effect on the loss before income taxes for the period ended March 31, 2015 of approximately \$6,084. The Company monitors its net exposure to foreign currency fluctuations and adjusts its cash held in U.S. dollars accordingly. The following table lists the Canadian dollar equivalent of financial instruments and other current assets denominated in U.S. dollars as of March 31, 2015:

Notes to the condensed consolidated interim financial statements March 31, 2015

Reclamation bond		259,861		238,011	
Accounts payable and accrued liabilities		242,824		577,074	

(e) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure.

Accounts payable and accrued liabilities are due within the current operating period.

9. Segmented Information

The Company currently operates in one segment, being the exploration of mineral properties in Nevada and Western Utah, USA. The Company's cumulative mineral property expenditures since inception in Nevada and Western Utah totaled \$43,312,316. The Company's executive and head office is located in Vancouver, British Columbia, Canada.

11. Commitments and Contingencies

To acquire certain other mineral property interests in Nevada the Company must make optional acquisition and expenditures in order to satisfy the terms of existing agreements, failing which the rights to such mineral properties will remain as they are currently. For details of the Company's mineral property acquisitions and optional expenditure commitments see Note 5. The Company has no other identified commitments or contingencies.

12. Subsequent Events

The following event occurred subsequent to period end. This event and other non-material subsequent events may be mentioned elsewhere in the financial statements.

On May 7, 2015 due to the small footprint and low environmental impact the BLM confirmed its decision to evaluate the Three Hills project under the Environmental Assessment ('EA') criteria, which is a significantly faster and less costly process than an Environmental Impact Statement. This decision allows the mine plan and timeline for the Three Hills and Hasbrouck gold deposits to be finalized in the prefeasibility study being produced by independent engineers Mine Development Associates which is expected in the second quarter of 2015.
