

West Kirkland Mobilizes Drill to Bullion Mountain Project, Cortez Area, Nevada

VANCOUVER, BRITISH COLUMBIA, September 8, 2011 - West Kirkland Mining Inc. (WKM:TSXV) (“West Kirkland” or the “Company”) announces today the commencement of the drill program on the Company’s Bullion Mountain Project.

Bullion Mountain is located 12 kilometers north of the Pipeline Mine of Barrick. On September 7, 2011, Barrick announced a new discovery 24 kilometers southeast of Pipeline which highlights the continued potential of the region. The target at Bullion is the north-south structures projected from the Pipeline mine and the potential flat Roberts Mountain thrust structures that control gold deposits in the region.

The Company has received its permit from the Bureau of Land Management for the proposed drill program and a drill is being mobilized in September, pending completion of the drill roads in progress.

The Pipeline Mine, the new discoveries by Barrick and the Bullion Property are part of the Battle Mountain Trend, one of the most prolific gold trends in North America. Recent exploration has been successful in finding high grade gold in addition to the near surface lower grade types of gold deposits found in the 1980’s and 1990’s. Surface exploration at Bullion has returned 10 g/t gold surface samples and the target at Bullion is at depth of 500 to 600 meters.

West Kirkland Mining can earn a 60% interest in Bullion as part of a transaction (announced Dec 16, 2010) with Fronteer Gold involving 11 properties. Fronteer was subsequently taken over by Newmont. WKM can earn a 60% interest in the Bullion property specifically by spending US\$ 1,800,000 over 4 years.

Qualified Person

Michael G. Allen, Vice President of Exploration for West Kirkland, and a Qualified Person as defined by Canadian National Instrument 43-101, has reviewed the information contained in this news release.

About West Kirkland Mining

West Kirkland Mining was formed in 2010 to focus on gold exploration along major trends in North America. The Company has consolidated significant mineral rights positions in the Kirkland Lake area of Ontario and within major gold trends of North Eastern Nevada - two of North America’s premier gold jurisdictions. WKM has current active drill programs in Nevada at the TUG deposit in the Long Canyon Trend and in Kirkland Lake on the main Breaks.

The founders and Board of West Kirkland Mining have successful gold mine discovery, development and mine operations experience in both Ontario and Nevada over the past 40 years.
