

a GREAT PROJECT needs A SOLID GOLD STRATEGY

Compliance with NI 43-101 and Cautionary Statements

Hasbrouck Project Pre-Feasibility Study, and Mineral Resource and Mineral Reserve Estimates.

Certain information in this presentation has been taken from West Vault Mining's news release of January 23rd, 2023, "West Vault Mining Announces 51% IRR Pre-Feasibility Study Update for Hasbrouck Gold Project", in which information has been summarized from the Technical Report and Updated Preliminary Feasibility Study: Hasbrouck and Three Hills Gold-Silver Project, Esmeralda County, Nevada – RESPEC, January 2023, prepared by Thomas L. Dyer, P.E., and Jeff Bickel, C.P.G. of RESPEC, Reno, with contributions by Mark Jorgensen, SME, of JE&TS (metallurgy), Ryan Baker, P.E., of NewFields (civil and heap leach) and Carl Defilippi, SME, of KCA (process design). Each aforementioned person is a "Qualified Person" or a "Expert Relied Upon" under NI 43-101, is independent of West Vault and has reviewed and approved the information in this presentation, as of the time that the Technical Report was produced and as relevant to the portion of the Technical Report for which they are responsible. RESPEC has reviewed and verified the data disclosed in this news release to be in conformity with generally accepted CIM "Estimation of Mineral Resource and Mineral Reserves Best Practices" guidelines as of the time of the Technical Report as required by NI 43-101.

For readers to fully understand the information in this presentation, they should read the Technical Report (available on www.SEDAR.com or at www.westvaultmining.com) in its entirety, including all qualifications, assumptions, and exclusions that relate to the information set out in this presentation that qualify the technical information contained in the Technical Report. The Technical Report is intended to be read as a whole, and sections should not be read or relied upon when taken out of the context of the full Technical Report. The technical information in this presentation is subject to the assumptions, qualifications, and exclusions contained in the Technical Report.

Exploration targets include conceptual geophysical targets, geochemical targets from soil, rock and trench samples, and results from widely spaced drill holes; as a result, the potential size and tenor of the targets are conceptual in nature. There has been insufficient exploration to define Mineral Resources on these prospects and this data may not be indicative of the occurrence of a mineral deposit. Such results do not provide assurance that further work will establish sufficient grade, continuity, metallurgical characteristics, or economic potential to be classed as a category of Mineral Resource. Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.

Mineral Resources exclusive of Mineral Reserves are reported based on a fixed gold cut-off grade of 0.45 g/t for sulfide and 0.40 g/t for oxide, and in relation to conceptual Mineral Resource pit shells and Mineral Reserve pits to demonstrate potential economic viability as required under NI 43-101. Indicated Mineral Resources exclusive of Mineral Reserves are reported to demonstrate potential for future expansion should economic conditions warrant. Inferred Mineral Resources exclusive of Mineral Reserves are reported to demonstrate potential to increase in-pit production should Inferred Mineral Resources be successfully converted to Mineral Reserves; mineralization lying outside Mineral Resource pit shells is not reported as a Mineral Resource. Mineral resources are not Mineral Reserves and do not have demonstrated economic viability. These Mineral Resource estimates include Inferred Mineral Resources that are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as Mineral Reserves. It is reasonably expected that some Inferred Mineral Resources could be upgraded to Indicated.

References in this presentation to active mines and other mineral projects is for illustration purposes only. There can be no assurances the Company will achieve comparable results.

This presentation has been prepared by West Vault Mining Inc. ("West Vault", "WVM" or the "Company") in accordance with Canadian regulatory requirements set out in National Instrument 43-101 and has been reviewed and verified by Sandy McVey P.Eng., West Vault's Chief Executive Office, a non-independent Qualified Person as defined by NI 43-101 as conforming to NI 43-101

Forward-looking Statements and Cautionary Note to US Investors

Forward-looking Information. This presentation contains forward-looking information or forward-looking statements (collectively, “forward-looking information”) within the meaning of applicable securities laws. Forward-looking information is typically identified by words such as: “simple”, “ready-to-build”, “low”, “high”, “high”, “minimize”, “avoid”, “risky”, “premature”, “cash-conservation”, “strong economics”, “high leverage”, “re-rating potential”, “strengthens”, “discipline”, “committed”, “transparent”, “long-term-focused”, “unique”, “very few”, “fully-permitted”, “minimal risk”, “strong visibility”, “drives value accretion”, “potential strategic partner or financing alternatives”, “potential M&A”, “low overhead”, “undervalued”, “profitable”, “low-risk”, “high-reward”, “right time”, “disciplined”, “aligned”, “poised for re-rating”, “no dilution”, “simple, profitable”, “quick”, “strong exploration potential”, “high-grade structures”, “easy road access”, “an upside opportunity”, “all necessary infrastructure”, and similar expressions, or are those, which, by their nature, refer to future events. Forward-looking information in this presentation includes, without limitation, the statements regarding the ability to achieve the recoveries and the processing capacity of the mines; regulatory processes and permitting; estimates of gold or other minerals grades; anticipated costs, anticipated sales, project economics, the realization of expansion and construction activities and the timing thereof; production estimates and other statements that are not historical facts. Information concerning Mineral Reserve estimates and the economic analysis thereof contained in the Technical Report are also forward-looking information in that they reflect a prediction of the mineralization that would be have been encountered, and the results of mining it, if a mineral deposit had been developed and mined at the time of the Technical Report and the assumptions in the Technical Report had remained correct. Although West Vault believes that such timings and expenses as set out in this presentation are reasonable, it can give no assurance that such expectations and estimates will prove to be correct. The Company cautions investors that any forward-looking information provided by the Company is not a guarantee of future results or performance, and that actual results may differ materially from those in forward-looking information as a result of various factors, including, but not limited to, the state of the financial markets for the Company’s equity securities, the state of the market for gold or other minerals that may be produced generally, significant increases in any of the machinery, equipment or supplies required to develop and operate a mine, a significant change in the availability or cost of the labor force required to operate a mine, a significant increases in the cost of transportation for the Company’s products, variations in the nature, quality and quantity of any mineral deposits that may be located, the Company’s ability to obtain any necessary permits, consents or authorizations required for its activities, to raise the necessary capital or to be fully able to implement its business strategies and other risks associated with the exploration and development of mineral properties. The reader is referred to the Company’s public filings for a more complete discussion of such risk factors and their potential effects which may be accessed through the Company’s profile on SEDAR at www.sedar.com.

Cautionary Note to US Investors Regarding the Use of Mining Terms. This presentation has been prepared in accordance with the securities laws in effect in Canada, which differ from the requirements of U.S. securities laws. Unless otherwise Indicated, all reserve estimates included in this presentation have been prepared in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy, and Petroleum Definition Standards on Mineral Resources and Mineral Reserves (the “CIM Definition Standards”). NI 43-101 is a rule developed by the Canadian Securities Administrators which establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Canadian standards, including NI 43-101, differ from the requirements of the U.S. Securities and Exchange Commission (the “SEC”) under subpart 1300 of Regulation S-K (the “SEC Modernization Rules”), and resources and reserve information contained herein may not be comparable to similar information disclosed by U.S. companies. The SEC Modernization Rules replaced the historical property disclosure requirements included in SEC Industry Guide 7. As a foreign private issuer the Company is not currently subject to the SEC Modernization Rules. The SEC Modernization Rules includes the adoption of terms describing Mineral Reserves and Mineral Resources that are “substantially similar” to the corresponding terms under the CIM Definition Standards. As a result of the adoption of the SEC Modernization Rules, the SEC now recognizes estimates of “Measured Mineral Resources”, “Indicated Mineral Resources” and “Inferred Mineral Resources”. In addition, the SEC has amended its definitions of “proven Mineral Reserves” and “probable Mineral Reserves” to be “substantially similar” to the corresponding CIM Definitions. U.S. investors are cautioned that while the above terms are “substantially similar” to CIM Definitions, there are differences in the definitions under the SEC Modernization Rules and the CIM Definition Standards. Accordingly, there is no assurance any Mineral Reserves or Mineral Resources that the Company may report as “proven Mineral Reserves”, “probable Mineral Reserves”, “Measured Mineral Resources”, “Indicated Mineral Resources” and “Inferred Mineral Resources” under NI 43-101 would be the same had the Company prepared the reserve or resource estimates under the standards adopted under the SEC Modernization Rules. U.S. investors are also cautioned that while the SEC recognizes “Measured Mineral Resources”, “Indicated Mineral Resources” and “Inferred Mineral Resources” under the SEC Modernization Rules, investors should not assume that any part or all of the mineralization in these categories will ever be converted into a higher category of Mineral Resources or into Mineral Reserves. Mineralization described using these terms has a greater amount of uncertainty as to its existence and feasibility than mineralization that has been characterized as reserves. Accordingly, investors are cautioned not to assume that any Measured Mineral Resources, Indicated Mineral Resources, or Inferred Mineral Resources that the Company reports are or will be economically or legally mineable. Further, “Inferred Mineral Resources” have a greater amount of uncertainty as to their existence and as to whether they can be mined legally or economically. Therefore, U.S. investors are also cautioned not to assume that all or any part of the “Inferred Mineral Resources” exists. Under Canadian securities laws, estimates of “Inferred Mineral Resources” may not form the basis of feasibility or pre-feasibility studies, except in rare cases. For these reasons, the Mineral Reserve and Mineral Resource estimates and related information in this presentation may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.

Investment Highlights

Hasbrouck Gold Project

- A simple, ready-to-build project in Nevada, 100% owned
- Strong economics (110% after-tax IRR at US\$2,600 gold)*
- Low corporate overhead, frugal management
- High insider ownership (48%)
- Patience is key - build or sell only when the time is right

* Source – “Technical Report and Updated Preliminary Feasibility Study: Hasbrouck and Three Hills Gold-Silver Project, Esmeralda County, Nevada” – produced by RESPEC, January 2023, with contributions from Thomas Dyer, P.E., J. Bickel, C.P.G., Mark Jorgensen, R.M., SME, Ryan Baker, P.E., and Carl Defilippi, R.M., SME

Strong Economics (2023 Pre-Feasibility Study)

| | | |
|--------------------------------|---|----------------------------|
| Gold production* | - | 71,000 oz/year for 8 years |
| Initial Capex* | - | US\$66M |
| All-in Sustaining Cost* | - | US\$877/oz |
| IRR, after-tax (\$2,600 gold)* | - | 110% |
| NPV (5%) (\$2,600 gold)* | - | US\$503M |

* Source – “Technical Report and Updated Preliminary Feasibility Study: Hasbrouck and Three Hills Gold-Silver Project, Esmeralda County, Nevada” – produced by RESPEC, January 2023, with contributions from Thomas Dyer, P.E., J. Bickel, C.P.G., Mark Jorgensen, R.M., SME, Ryan Baker, P.E., and Carl Defilippi, R.M., SME

Hasbrouck - both Profitable, and Highly Sensitive to Gold Price

After Tax Sensitivity - Metal Price (US\$000)

| Gold Price | NPV 5% | IRR |
|----------------|------------------|------------|
| \$1,000 | -\$104,062 | n/a |
| \$1,200 | -\$22,598 | -3% |
| \$1,400 | \$56,585 | 20% |
| \$1,600 | \$134,071 | 37% |
| \$1,790 | \$206,159 | 51% |
| \$2,000 | \$285,127 | 67% |
| \$2,200 | \$358,994 | 82% |
| \$2,400 | \$432,100 | 96% |
| \$2,600 | \$503,418 | 110% |

High leverage to gold price

Will re-rate as gold strengthens

BASE CASE

See cautionary language about the Technical Report on page 2

Big Money Supports Our Gold-in-Ground Strategy

72% INSTITUTIONALLY HELD

| | |
|------------------------|------|
| Sun Valley Gold | 46% |
| Ruffer | 17% |
| Eric Sprott | 5% |
| Konwave AG (Gold 2000) | 4% |
| Management & Insiders | 1.6% |

Market Positioning

- Unique Property - not many permitted, construction- ready gold developers in Nevada
- Minimal risk - pending decision to build or sell
- Strong visibility with gold-focused funds, long-term investors
- No legacy liabilities or third-party encumbrances

Possible Catalysts

- Higher gold price drives value accretion
- Exploration on and near property, by us or others
- Potential strategic partner or financing alternatives
- Potential M&A

Capital Structure

| | |
|--------------------|--------------|
| Shares Outstanding | 58M |
| Market Cap | US\$84M |
| Cash | US\$1.6M |
| Debt | None |
| Low overhead | US \$1M/year |

Why Invest Now

1. Undervalued against peers
2. Low-risk strategy – sell or build only at right time
3. Disciplined management 100% aligned with shareholders
4. Poised for re-rating as market recognizes upside potential
